

LEGZ & JINX - Market-Verified 20 Pieces

September 21, 2026 | Snapshot prepared from current publicly verifiable PrizePicks and Kalshi market information. Lines and contract prices can move before lock.

Integrity rule: no prop is called a Goblin or Demon unless that status is explicitly verifiable. A 20 Piece means the highest-ranked 20% of the current verified inventory, not necessarily 20 individual props.

1. Green Goblin 20 Piece - PrizePicks

The public PrizePicks material available at this snapshot explicitly identifies only two current Green Goblins for NYG-LAR. That is below the six distinct legs required for an all-Goblin six-leg ticket, so no fake Goblin labels were added.

Rank	Player	Market	Side	Status / rationale
1	Kyren Williams	0.5 Anytime TD	MORE	Verified Goblin; 77.8% of L.A. red-zone snaps in Week 1 and 75% of rushes inside the 10.
2	Davante Adams	0.5 Anytime TD	MORE	Verified Goblin; elite 2025 red-zone TD production and potential added volume if Puka Nacua is limited.

Goblin best-of ticket status: NOT ISSUED as an all-Goblin six-leg. Only two live Goblin labels could be independently verified. The safer alternative below is clearly marked hybrid rather than misrepresented.

Hybrid safety six (2 verified Goblins + 4 normal-market legs): Kyren Williams MORE 0.5 TD; Davante Adams MORE 0.5 TD; Matthew Stafford MORE 238.5 pass yards; Jaxson Dart MORE 33.5 rush yards; Kyren Williams 60+ rush yards (Kalshi); Malik Nabers 60+ receiving yards (Kalshi).

2. Normal / Market 20 Piece - Kalshi + PrizePicks

Rank	Player	Book	Line	Pick	L&J; note
1	Matthew Stafford	PrizePicks	238.5 pass yards	MORE	2025 avg 276.9; current PP article says projection is low.
2	Jaxson Dart	PrizePicks	33.5 rush yards	MORE	54 rush yards on 11 carries Week 1; Rams run defense struggled.
3	Kyren Williams	Kalshi	60+ rush yards	YES	Market around mid-50s; external projection cited at 74.6.
4	Malik Nabers	Kalshi	60+ receiving yards	YES	55-56% market range; 8 of last 10 underdog games over 60 cited.
5	Kazuma Okamoto	PrizePicks	5 fantasy score	MORE	Hit in 13 of 17 September games; strong barrel/xSLG profile.
6	Coby Mayo	PrizePicks	5 fantasy score	MORE	155 wRC+ since ASB; hit in 8 of last 10.
7	Kyren Williams	Kalshi	14.5 receiving yards	OVER	Current Kalshi market around 50%; favorable receiving-use thesis.
8	Anthony Kay	PrizePicks	20.5 fantasy score	LESS	Current listed projection; external current-day pick favors Less.
9	Kyle Harrison	PrizePicks	30.5 fantasy score	LESS	Current listed projection; external current-day pick favors Less.
10	Chase Burns	PrizePicks	36.5 fantasy score	LESS	Current listed projection; external current-day pick favors Less.

Best six - Normal/Market: Stafford MORE 238.5 pass yards; Dart MORE 33.5 rush yards; Kyren 60+ rush yards; Nabers 60+ receiving yards; Okamoto MORE 5 fantasy score; Mayo MORE 5 fantasy score.

3. Aggressive / Demon 10 Piece

This is the higher-upside pool. PrizePicks Demon status is used only where explicitly verified. Kalshi legs are labeled by their actual contracts rather than being falsely called Demons.

Rank	Player	Source	Market	Pick	L&J; note
1	Jaxson Dart	PrizePicks Demon	0.5 Anytime TD	MORE	Verified Demon; rushing role and red-zone mobility.
2	Cam Skattebo	Kalshi	Anytime TD	YES ~43%	Meaningful scoring share; aggressive but plausible.
3	Puka Nacua	Kalshi	Anytime TD	YES ~42%	Only if active; hip status materially raises variance.
4	Malik Nabers	Kalshi	Anytime TD	YES ~32%	High target concentration; elevated payout profile.
5	Jaxson Dart	Kalshi	2+ passing TDs	YES ~34%	Three pass TDs in Week 1; higher-variance repeat case.
6	Jaxson Dart	Kalshi	40+ rush yards	YES ~37%	Strong rushing role; threshold above standard line.
7	Isaiah Likely	Kalshi	1+ TD	YES ~24%	Low-priced TD contract; payout compensates for lower hit rate.
8	Colby Parkinson	Kalshi	1+ TD	YES ~24%	Low-priced TD contract; correlated with Rams red-zone passing.
9	Davante Adams	Kalshi	Anytime TD	YES ~50%	High red-zone pedigree; better probability than most TD contracts.
10	Kyren Williams	Kalshi	Anytime TD	YES ~60%	Best probability anchor among the listed TD contracts.

Best six - Aggressive/Demon: Kyren Williams anytime TD; Davante Adams anytime TD; Jaxson Dart MORE 0.5 anytime TD (PrizePicks Demon); Cam Skattebo anytime TD; Jaxson Dart 2+ passing TDs; Malik Nabers anytime TD. This is not a “most likely to all hit” construction in the literal sense: six-leg joint probability compounds sharply downward. It is the strongest six from the aggressive pool by probability/upside balance.

Market verification notes

PrizePicks current NFL projections publicly showed Stafford, Dart, Williams, Skattebo, Nabers and Adams/Nacua lines near this snapshot. PrizePicks Playbook explicitly labeled Kyren Williams and Davante Adams as Goblins and Jaxson Dart 0.5 anytime TD as a Demon. Kalshi-related current reporting showed Rams/Giants player contracts including Stafford 225+, Williams 60+, Nabers 60+, touchdown probabilities, and higher-threshold Dart contracts. Because these markets move, re-check the app immediately before entry.

This document is a decision-support snapshot, not a guarantee of outcome. Avoid treating six-leg entries as “high probability” simply because individual legs look strong; joint hit probability decreases with every added leg.
